Location Boulder, CO, USA | [View Map](#)
Project Year 2020
Category Private Houses

Boulder Residence
Medium Plenty as Architects

The project scope was to fully reimagine an existing home to better suite a stylish family of four. The goal was to unify a somewhat chaotic structure into a more refined and orderly house. The interior and exterior were fully reworked to create a cohesive palette and composition. The interiors and house systems (the project is a net zero home) were transformed in collaboration with the owners resulting in an end result that perfectly reflects their sensibilities.
